One international Group, serving the global market.

●
L&S LIGHTING EQUIPMENT
SHANGHAI, CHINA
SINCE 2006

L&S Lighting was founded in Italy in 1977 to meet the needs of the furniture industry and soon became a leading international player.

Thanks to the high quality of our production activities and constant investment in technological research, we have progressively expanded our presence in foreign markets. We have had sales offices,

R&D departments and production facilities in Germany since 2002, in China since 2006 and in the USA since 2011. Today, the Group employs more than 500 people and operates in more than 50 countries. In 2022, we generated a global turnover of €130 million, of which over €65 million was generated in Germany.

For us, everything revolves around light. We offer efficient and modern lighting solutions for manufactures in the kitchen, bathroom and home furniture industries as well as for shopfitting and retail. We specialise in individual projects and can deliver flexibly, quickly and just-in-time from batch size 1 to large quantities.

RESIDENTIAL

RETAIL

MUSEUM

INDUSTRIAL

HOSPITALITY

DISTRIBUTION

Versatile solutions for various application areas.

Residential

Solutions dedicated to domestic environments, from the kitchen to the living area, from the bedroom to the bathroom. Light is discreetly integrated into the furniture. Illuminated mirrors and modular structures contribute to elegant and functional furnishings. Optical research ensures perfect illumination of the work surface.

Retail

A complete range of lighting solutions that enhance the products on display and enlighten the shopping experience. A combination of spotlights, downlight and panels integrated into shelving units create the perfect ambience for the products.

Museum

Dedicated solutions designed for museums and galleries. The light is artfully integrated into the installation, delivering a unique experience for the visitor. The effect highlights the works with a perfectly homogeneous light that enhances their chromatic aspects while complying with the strictest parameters of conservation.

Industrial

Customized integrated lighting for projects of manufacturers of lifts, escalators, cooling systems, extractor hoods, blinds and pergolas.

Hospitality

Lighting systems for the hotel industry and for the interiors of cruise liners and shipping vessels, promoting the wellbeing and comfort of guests and passengers.

Distribution

An all-round service and catalog dedicated to distributors who are looking for ease of installation, certified safety, fast delivery and sales support.

WITH A FOCUS ON TRAINING AND THE CREATION
OF INFORMATION MATERIAL TO SUPPORT OUR
SALES

Your provider for innovative solutions.

We plan and supply all the elements that are necessary for the correct lighting of an ambience in order to emphasise an exhibited product with the right light.

L&S offers a fully programme of lighting concept that is integrated into the furnishing elements. It matches the architectural lighting and thus improves our perception of the environment in which we live. We are the point of contact for all your interior lighting needs.

Customized service.

We offer a customised service that is tailored to the wishes and needs of our customers.

Our aim is to find the best solution for every project.

Innovation is our strength. That's why we co-operate with established architecture and design firms.

In co-operation with various universities, we support education and research in the fields of design, media and technology.

LEDs in 12V & 24V.

Lighting technology
in perfection.

L&S luminaires are labelled with symbols indicating the available low-voltage range - including our high-efficiency 24V LED strips.

Lighting technology for all applications.

LED lighting technology

Standard plug connectors offer the possibility of producing electrical cables in the high-voltage range at 210 - 230 volts, LED strips work with DC voltage for applications in the low-voltage range.

12V & 24V.

For indirect lighting or larger lighting installations, 24V LED strips are often used directly. At higher voltages, the current flow within the components decreases. This means that only half as much current needs to flow at 24V as at 12V.

Usually 24V LED strips can be installed twice as long and only need to be fed in half as often. However, the pitch distances are greater with a 24V LED strip. For some applications, it is therefore advisable to use a 12V LED strip.

New Light.

24V high-efficiency LED strips are now available at L&S.

They emit more light with less energy.

It enables a significant reduction in the number of converters. As a result, we can install luminaires up to 7 metres in length for work areas and even up to 14 metres for ambient lighting. The cutting intervals are also significantly smaller.

EDC

LIGHT WITH
INFRARED SWITCH

The light can be switched on and off with a simple hand movement in front of the sensor. The color temperature changes when the sensor is touched 4 times in quick succession.

Emotion/EDC

LIGHT WITHOUT
INFRARED SWITCH

The color temperature changes to warm or cold/natural light through the Emotion adapter cable.

Emotion/EDC

LIGHT WITH
EXTERNAL CONTROL

With the remote controls from L&S ist is possible to switch the light on and off, dim the lighting and change the colour temperature in stages.

EDC- Technology: Emotion Dual Color.

CHANGING COLORS HAS NEVER BEEN SO EASY.

The lights with EDC technology are equipped with an infrared switch that can be used to set the colour temperature to 3000 K or 4000 K in only 5 seconds with a simple hand motion over the switch.

Versions without integrated control are supplied with an Emotion adapter cable to change the color temperature without installing a second lighting device. Emotion is the innovative system developed by L&S to

control the gradual change in color temperature from warm white (2700 K) to cold white (6500 K) on a single luminaire with a simple gesture.

An easy-to-integrate system.

Emotion Dual Color can be integrated into most products. Emotion and EDC are also compatible with the various control systems from L&S, which can be used to change the color temperature in stages.

We plan for the world: certifications for all markets.

The products from L&S are designed to fulfil the most important requirements set out in the various legal standards. This keeps us ahead of future requirements.

Recent investments in our own certification centres enable us to obtain the necessary requirements and test marks more quickly.

In this way, we support exports for our partners in real time, even when regulations are updated.

Test laboratory for certifications.

The internal laboratory carries out tests on each product to ensure its safety and reliability. All the documentation required to obtain any type of certification according to specific international standards is provided.

Old vs. New Comparison

The new Tудо HE tapes are more efficient and emit more light with significantly lower energy consumption. That is why we now offer the new generation Tудо HE. The 24 V tapes replace both the old 12 V variants and the 24 V tapes. More light - less energy.

LED strip Tudo HE Emotion 4.0 24 V

- High efficiency LED strip
- Suitable for universal light applications
- Compatible with the Tudo modular system

Operating voltage:	DC 24 V
Dimensions:	8x1.5 mm
Power:	4.0 W
Color temperature:	Emotion
Color rendering index (CRI):	> 80
Luminous flux:	658 (CW)-672(WW) lm/m
Luminous efficacy:	164.5-168 lm/W
LED lifespan:	30.000 h
Number of LEDs:	112+112/m
Separation:	4+4/35.7 mm
Beam angle:	120°
IP protection rating:	IP20
Color:	White
Cable length:	2x2.000 mm

LED Strip RGB Flex 5.4 24 V

- Self-adhesive flexible LED-RGB light strip
- Combination of several strips through plug-in system
- Simple adhesive mounting

Operating voltage:	24 V
Dimensions:	10x2.5 mm
Power:	5.4 W/m
Color temperature:	RGB
Color rendering index (CRI):	>80
Luminous flux:	1772 /m lm/m
Luminous efficacy:	74 lm/W
LED lifespan:	30000 h
Number of LEDs:	12/m
Separation:	6 / 170 mm
Beam angle:	120°
IP protection rating:	IP20
Color:	White
Cable length:	1800 mm

Photometrics

CRI >80 L = 500 mm

Mounting set			2000349

Mec Porto 5

Product features: Surface-mounted profile
 Material: Aluminum EV1
 Color: Silver finish
 Dimensions: 3000x18x18 mm
 Groove dimensions: 17x12 mm

Usable LED strips and lighting effect on p. 244

Mec Porto 5	Length (mm)	Color	Ref.
Lighting profile	3000	Silver finish	2000311
Diffuser profile		Opal	2000312
End cap set		Silver finish	2000316

Mec Kel

Product features: Surface-mounted profile
 Incl. diffuser profile
 Material: Aluminum
 Color: Silver finish
 Dimensions: 2500x35x16 mm

Usable LED strips and lighting effect on p. 244

Mec Kel	Length (mm)	Color	Ref.
Lighting profile	2500	Silver finish	2000939
End cap set			2000940

Mec Lagos I

Product features: Front edge profile for cabinet ends
For grooving in 19 mm sides
Opal diffuser with silver colored film on front

Material: Aluminum

Color: Silver finish

Dimensions: 3000x9,4x22,6 mm

Groove dimensions: 3.5x8.5 mm

Usable LED strips and lighting effect on p. 244

Mec Lagos I	Length (mm)	Color	Ref.
Lighting profile	3000	Silver finish	2000476
End cap set			2000705

Mec Lagos II

Product features: Front edge profile for cabinet ends
For grooving in 19 mm sides
Opal cover with silver colored film on front and side

Material: Aluminum

Color: Silver finish

Dimensions: 3000x9,4x22,6 mm

Groove dimensions: 3.5x8.5 mm

Usable LED strips and lighting effect on p. 244

Mec Lagos II	Length (mm)	Color	Ref.
Lighting profile	3000	Silver finish	2000475
End cap set			2000705

Mec Lagos III

Product features: Front edge profile for cabinet ends
For grooving in 19 mm sides
Opal cover without film

Material: Aluminum

Color: Silver finish

Dimensions: 3000x9,4x22,6 mm

Groove dimensions: 3.5x8.5 mm

Usable LED strips and lighting effect on p. 244

Mec Lagos II	Length (mm)	Color	Ref.
Lighting profile	3000	Silver finish	2000477
End cap set			2000705

Mec Glass

Product features: Surface-mounted profile
Glass edge profile
For 8 mm glass shelves
Material thickness: 1,5 mm

Material: Aluminum EV1

Color: Silver finish

Dimensions: 2500x13x11 mm

Usable LED strips and lighting effect on p. 244

Mec Glass	Length (mm)	Color	Ref.
Lighting profile	2500	Silver finish	2000359

Mec Fly

Product features: Surface-mounted profile
Glass edge profile
For 6-8 mm glass shelves
Reduction glass shelf depth: 10 mm

Material: Plastic

Color: Stainless steel finish/Opal

Dimensions: 2050x15.2x19.2 mm

Usable LED strips and lighting effect on p. 244

Mec Fly	Length (mm)	Color	Ref.
Lighting profile	2050	Stainless steel finish/Opal	2000362

Mec Venice A

Product features: Top profile for 16 mm niche panels
Total width incl. End caps: 2700 mm
Holes for cable outlet
Including adapter profile

Material: Aluminum

Color: Stainless steel finish

Dimensions: 2700x19.2x56.9 mm (incl. end caps)

Usable LED strips and lighting effect on p. 244

Mec Venice A	Length (mm)	Color	Ref.
Top profile	2696	Stainless steel finish	2000883
		Black	2000884
End cap set		Stainless steel finish	2000885
		Black	2000886

Mec Rack

Product features: Surface-mounted profile
Mounting on the side of the cabinet or through the top shelf

Cutting length: Inner cabinet width -35 mm

Material: Aluminum

Color: Silver finish / Black

Dimensions: 3000x12x35.5 mm

Usable LED strips and lighting effect on p. 244

Mec Rack	Length (mm)	Color	Ref.
Lighting profile	3000	Silver finish	2000509

		Black	2000840
Center bearing		Silver finish	2000841
		Black	2000842

Mec Octopus

Product features: For use as a base lighting
Suitable for 4x10 mm Octopus LED strips
To stick on with horizontal light emission
For clipping with light emission downwards

Material: Aluminum

Color: Stainless steel finish / Black

Dimensions: 2200x20x6.6 mm
150x21.7x15 mm
2200x21.7x15 mm

To stick on:

To clip on base 13-14 mm:

Mec Ice	Length (mm)	Ref.
to stick on	2200	2000794
to clip on (Set with 15 pcs.)	150	2000793
to clip on	2200	2000871

Malindi Emotion

LINEAR

- Elegant LED recessed lighting profile with a low installation height
- Diffused light source with continuous light output
- Scratch-resistant surface
- Dimmable with continuously adjustable color temperature using Emotion technology
- Includes end caps and metal clips for mounting

Malindi Emotion

Power (W):	15.5 W/m
Luminous flux:	1170-1440 lm
Luminous efficacy:	75-93 lm/W
Number of LEDs:	120+120
Material:	Aluminium
IP protection:	IP20
Connection cord:	2000 mm
Energy efficiency class:	G
Start color:	Warm white (with Emotion adapter cable: Cool white)

Manila IV Emotion

LINEAR

- Elegant LED recessed profile with a small installation depth
- Diffused light source with continuous light output
- Dimmable with continuously adjustable color temperature using Emotion technology
- Includes end caps and metal clips for mounting

Manila IV Emotion

Power (W):	15.5 W/m
Luminous flux:	1170-1440 lm/m
Luminous efficacy:	75-93 lm/W
Number of LEDs:	120+120
Material:	Aluminium
IP protection:	IP20
Connection cord:	2000 mm
Energy efficiency class:	F
Start color:	Warm white (with Emotion adapter cable: Cool white)

Mini Noor 2

LINEAR

- Inconspicuous and versatile
- Recessed installation with mounting brackets
- Uniform light diffusion
- Perfect for shelf or cabinet interior lighting
- Light color Warm white or Natural white (adapter cable included)

Mini Noor 2

Power (W):	9.6 W/m
Luminous flux:	1296 lm
Luminous efficacy:	135 lm/W
Number of LEDs:	184+184
Material:	Aluminum
IP protection:	IP20
Connection cord:	3000 mm
Energy efficiency class:	E
Start color:	Warm white (with Emotion adapter cable: Cool white)

MEC DRIVER

Modular control system.
More possibilities.

ONE DRIVER, INFINITE SOLUTIONS

MEC DRIVER REVOLUTIONISES THE WORLD OF LED LIGHTING

It is now possible to build a modular power supply system for lighting and home automation, ready and certified for almost every market in the world.

The core of the system is the new multi-voltage power supply available in 6 different wattages (18, 36, 48, 60-72, 90, 120 W) and modular with all major sockets. Modules can be connected to it to remotely control all lighting, sound and home automation functions.

This provides a complete control solution with a small footprint.

ALWAYS THE BEST COMBINATION

BOTH DC 12 V AND DC 24 V

Operates on both DC 12 V and DC 24 V

4

types of modules available

V

Multi voltage
Input: AC 100 / 230 V
Output: DC12 V / DC 24 V

International certificates

Remote control via ZigBee, radio frequency (R.F.) or wired sensors

Configuration examples

STANDARD

Mec Driver + Distributor module

The power supply unit is connected to the mains using the connection cable. Combined with a distribution module, up to 8 lights can be connected.

SWITCHING OF LUMINAIRES VIA SENSORS

Mec Driver + Switching module

The power supply unit is connected to the mains using the connection cable. Combined with the switching module, up to three luminaire groups can be controlled via wired and/or wireless sensors.

For single-color and Emotion luminaires.

Emotion color temperature adjustable on the module

EMOTION CONTROL WITH SMART HOME CONNECTION

Mec Driver + ZigBee Module

The power supply unit is connected to the mains using the connection cable. Combined with a ZigBee function module, up to four lights can be connected and controlled via remote control, ZigBee network or Smart Home (e.g. Alexa¹ / Hue²). If you use the 4-channel module, four groups of lights can be controlled separately.

For single-color and Emotion luminaires.

RGB AND EMOTION CONTROL

Mec Driver + RGBW Module

The power supply unit is connected to the mains using the connection cable. Combined with the RGBW function module, up to three RGB luminaires can be connected and controlled by remote control.

An output for Emotion luminaires is also integrated and can be controlled via the remote control.

* 3 A = 12 V: max. 36W, 24 V: max. 72 W

Mec Driver switching module

- Control via wired and/or wireless sensors (IR, capacitive or motion detector)
- 3 luminaire groups with two LED outputs each
- Max. 3 A per output, max. 5 A overall*
- Group switching (3 groups), or switching, cross switching of LED outputs
- Light color adjustable via DIP switch (Emotion luminaire required)

Radio frequency:	2.4 GHz
Number of channels:	3
LED output:	3x2 Mini LED socket
Sensor input:	3x HX plug
Color:	White

* 12 V: max. 36 W per output, max. 60 W overall;
24 V: max. 72 W per output, max. 120 W overall

Dimensions

Connection of wired sensors

Connection of radio sensors

1. Open the battery compartment of the sensor.
2. Briefly press the button to choose group. Then press the button for approx. 4 seconds to activate teach-in mode.
3. Close the battery compartment of the sensor. The sensor is now ready for use.

Function modes

Group circuit
Each lighting group is switched and dimmed via the corresponding sensor.

Suitable for:
IR sensor
Door contact switch
Motion detector
Rocker switch
CAP sensor

Or circuit
All luminaire groups are switched together, regardless of which sensor is actuated.

Suitable for:
Door contact switch
Motion detector
Rocker switch
CAP sensor

Cross circuit
All luminaire groups are switched together. Each sensor can switch and dim.

Suitable for:
IR sensor
Rocker switch
CAP sensor

Mec Driver IR-Sensor On/Off Dimmer

- Product features:**
- Wireless IR sensor
 - Battery operated CR2450
 - Optionally as surface-mounted or recessed version
 - Max. range approx. 6 m , detection range 1-50 mm
 - 49x46x12.5 mm including mounting case, installation dimensions 47.4x45x11.5 mm
- Functions:**
- ON/OFF by short touch
 - Dimming by long touch

Dimensions

Mec Driver sensor	Color	Ref.
IR-Sensor On/Off Dimmer	Black	2000606
	White	2000607

Mec Driver IR-Sensor door contact

- Product features:**
- Wireless IR sensor
 - Battery operated CR2450
 - Optionally as surface-mounted or recessed version
 - Max. range approx. 6 m , detection range 1-50 mm
 - 49x46x12.5 mm including mounting case, installation dimensions 47.4x45x11.5 mm
- Functions:**
- Light ON/OFF by contact. Automatic switch-off when door is open (time setting via function module)

Dimensions

Mec Driver sensor	Color	Ref.
IR-Sensor door contact	Black	2000608
	White	2000609

Mec Driver motion detector

- Product features:**
- Wireless motion detector
 - Battery operated CR2454
 - Optionally as surface-mounted or recessed version
 - Detection angle approx. 80°
 - Detection distance: max. 3000 mm
 - 49x46x14.5 mm incl. mounting case, Installation dimensions 47.4x45x11.5 mm
- Functions:**
- ON/OFF by approach / movement. Run-on time adjustable via function module

Dimensions

Mec Driver sensor	Color	Ref.
Motion detector	Black	2000610
	White	2000611

Application

Example configuration:

- Mec Driver
- Switching module
- IR/TK sensor, wired (A)
Slot „sensor 1”/luminaire group 1 (LED 1)
- IR sensor door contact, wireless sensor (B)
taught to luminaire group 2 (LED 2)

LED 1

LED 2

Mec Driver 1 channel module Radio/ZigBee

- Operation via remote control or Smart Home applications
- ZigBee Mesh even without Bridge (components connect to each other)
- 1 channel, 4 LED outputs
- Max. 3 A per output, max. 5 A overall*
- Easy to pair
- Switch between single color and Emotion LEDs

Radio frequency:	2.4 GHz
Number of channels:	1
LED output:	Mini LED Socket
Sensor input:	-
Color:	White

Mec Driver 4 channel module Radio/ZigBee

- Operation via remote control or Smart Home applications
- ZigBee Mesh even without Bridge (components connect to each other)
- 4 channels with one LED output each
- Max. 3 A per output, max. 5 A overall*
- Easy to pair
- Switch between single color and Emotion LEDs

Radio frequency:	2.4 GHz
Number of channels:	4
LED output:	Mini LED Socket
Sensor input:	-
Color:	White

Dimensions

Dimensions

4		White	754000014

Light in the cabinet

The door contact switch shown below can be used with the 1-channel and 4-channel module.

When Emotion LEDs are used, the Emotion signal is passed on. This means that both the light color and dimming level can be individually adjusted.

IR door contact switch Emotion

Product features:

- Door contact switch for 12 or 24 Volt systems
- Single, oder sensor separately!

Operating voltage:

- DC 12 V
- DC 24 V (with connection set art. no. 2000438)

Max. power:

- 36 / 72 W

Cable length:

- pri.: 200 mm
- sec.: 200 mm

Functions

- Door contact (door open = ON, door closed = OFF)

IR door contact switch		Color	Ref.
1	IR door contact switch		2000976
2	IR sensor for door contact switch	Black	2000608
3		White	2000609

Mec Driver RGBW 1 channel module

- Control of RGB and Emotion luminaires via remote control
- 3 outputs for RGB LEDs, 1 output for Emotion LEDs
- Max. 3 A per output, max. 5 A overall*
- Memory function for light color and dimming level
- Ready for operation, the remote control is already programmed
- Adapter for Emotion and RGB LEDs with square plug-in system included in the set

Radio frequency:	2.4 GHz
Number of channels:	1x RGB / 1x Emotion
LED output:	RGB: 4PIN round Emotion: Mini LED Socket
Sensor input:	-
Color:	White

Dimensions

Mec Driver function module	Voltage (V)	Outputs	Ref.

* 3 A = 12 V: max. 36W, 24 V: max. 72 W / 5 A = 12 V: max. 60 W, 24 V: max. 120 W

Application

The RGB module can be used to control RGB and Emotion LEDs. Various connector systems can be used via adapters.

Connection of RGB LEDs with square plug-in system

- The RGB adapter must be used for the connection

Connection of RGB LEDs with round connector system

- Direct connection to the module

Connection of Emotion LEDs with mini LED plug

- The Emotion adapter must be used for the connection
- Only use 24 V Emotion LEDs

Emotion DRIVER

Proven and reliable.
Wide range of accessories.

Converter, emotion control and Bluetooth receiver in one device. Different functions can be provided via the function modules (see below): from connecting a door contact switch to wireless control via app * / voice control **.

- Suitable for all L&S Emotion lighting systems
- 12 or 24 V driver
- Plug-in power cord
- Daisy-chain connection is possible, i.e. up to 10 L&S Emotion Drivers can be connected to a connection cable using plug-in connecting cables
- Two plug-in switch connections for the Emotion-IR Sensor / door contact sensor and motion detector
- Integrated distribution strip for L&S Emotion LED lights
- 15 W with 4 slots, 30W and 60W with 6 slots each
- Wireless communication between the emotion drivers

*1 App available free of charge in the Playstore or Apple Store.

*2 L&S Emotion Home Base and voice assistant required.

*3 Max. 36 W per output

*4 Max. 72 W per output

Radio remote control / wall switch (2 buttons) for Emotion Driver	Ref.
Emotion radio remote control/wall switch (2 buttons)	2000668

Emotion 1-channel radio control Frankfurt series

- Control system for LED Emotion lights
- Control via remote control (see below)
- Continuously adjustable color temperature from Warm white to Cool white
- Incl. LED driver with 16 mm height
- Can be expanded as required, can be combined with 12 and 24 V control unit
- On/off and dimming at the touch of a button, color temperature adjustable via rotary wheel (remote control see below), memory function: storage of the last setting, Auto On: settings are retained even after power loss

Radio frequency:	2.4 GHz
Number of channels:	1
Cable length:	pri.: 2000 mm sec.: 180 mm

Dimensions

* Max. 36 W per 3 A fuse
(3 socketse), see below

** Max 72 W per 3 A fuse
(4 sockets), see below

Emotion 1-channel remote control Frankfurt series

Can be used with function module 2 and 3.
One remote control per Emotion Driver possible.

Product features:	Stepless adjustment of the color temperature Dimming function incl. Wall bracket for remote control
-------------------	---

Dimensions

Frankfurt series	Color	Ref.
1-channel remote control	White	2000374
	Black	2000375

* L&S Emotion Home Base required

4-channel remote control Frankfurt series

Functions: Universal remote control Emotion / RGB / Dimming
4 channels, 2 light scenes memory function
LED display field
Continuous adjustment of the light color
Dimming function with three dimming levels

Color: White

Dimensions

Frankfurt series		Ref.
1	4-channel remote control Frankfurt series	2000292
2	Wall bracket	2000698

Emotion radio remote control/wall switch (2 buttons) for Emotion Driver

Functions: Can be used with function modules 2 and 3
Several remote controls per controller possible
Alternating circuits can be realized
Continuous adjustment of the light color, adjustment of the color temperature
Can be used as a socket insert, for installation or as a hand-held remote control
Including mounting ring and add-on housing

Color: Silver finish

Dimensions

Emotion Home Base Frankfurt series

- Gateway for connecting control units from the Frankfurt series to smart home networks
- Control via voice, app or remote control
- Voice control in connection with a Zigbee Bridge and a Smart Speaker
- Up to 4 lighting groups can be controlled
- Existing light controls from the Frankfurt series can be retrofitted easily

Input voltage:	AC 230 V
Operating voltage:	DC 5 V
Radio frequency:	2.4 GHz
Radio standard:	ZigBee 3.0
Color:	White
Connection:	Plug-in power supply (included in the scope of delivery)
Cable length:	1000 mm

A remote control is required for designation!

Dimensions

Requirements for operation

- Existing Zigbee Bridge (we recommend the Philips Hue Bridge¹)
- Existing light control from the Frankfurt series

Requirement for voice control

- Existing smart speaker (e.g. Amazon Echo², not compatible with Apple HomeKit)

The function of the Emotion Home Base with Amazon Alexa² and Google Assistant³ as well as the Philips Hue¹ Bridge were tested at the time this catalog page was created. We have no control over any changes or further development of the apps in the meantime. We do not claim that the information is correct or complete. Other voice assistants can also be used. Please refer to the respective provider's instructions for use.

Dimmable LED converter 12 V / 30 W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 20-100% (for most dimmers)
- Incl. 6 way distributor
- Cable length primary: 3000 mm

LED converter 230 V / 12 V	Power (W)	Ref.
Dimmable LED converter	6-30	2000568

Dimmable LED converter 12 V / 50 W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 20-100% (for most dimmers)
- Incl. 6 way distributor with 2x 3 A fuse
- Cable length primary: 3000 mm

LED converter 230 V / 12 V	Power (W)	Ref.
Dimmable LED converter	19.2-50	2000570

Dimmable LED converter 12 V / 132 W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 10-100%
- Incl. 2x 6 way distributor with 2x 3 A fuse each
- Cable length primary: 3000 mm

LED converter 230 V / 12 V	Power (W)	Ref.
Dimmable LED converter	48-132	2000572

Dimmable LED converter 12 V / 30 W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 20-100% (for most dimmers)
- Incl. 6 way distributor
- Cable length primary: 3000 mm

LED converter 230 / 24 V 30 W	Power (W)	Ref.
Dimmable LED converter	6-30	2000569

Dimmable LED converter 12 V / 75 W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 10-100%
- Incl. 12 way distributor with 3x 3 A fuse
- Cable length primary: 3000 mm

LED converter 230 / 24 V	Power (W)	Ref.
Dimmable LED converter	24-75	2000571

Dimmable LED converter 12 V / 150W

- Dimmable LED driver by trailing edge and leading edge dimmers, dimming range 10-100%
- Incl. 12 way distributor with 3x 3 A fuse
- Cable length primary: 3000 mm

LED converter 230 / 24 V	Power (W)	Ref.
Dimmable LED converter	48-150	2000573

DALI Dim switch 72 W / 144 W

- DALI dimmer with 12-fold LED distributor
- AC Push, 0-10V, phase cut
- Operation of LED luminaires with separate LED converter

Operating voltage:	DC 12V
Max. power:	72 W (12 V) 144 W (24 V)
Max. current:	6 A
LED output:	12x Mini LED socket
Cable length:	pri.: - sec.: 200 mm

Dimensions

Functions

HV AC universal infrared sensor switch

Product features:	Non-contact sensor switch for connecting up to 3 sensors All lights or converters connected to the sensor switch are switched Order sensors separately! Automatic shutdown after approx. 8 hours without switching impulse	
Operating voltage:	230 V	
Max. power:	550 W	
Color:	Black	
Cable length:	pri.:	3000 mm
	sec.:	500 mm

Connection

Commissioning:

When first installed on the circuit, the connected sensor is calibrated. The installation is completed when the connected lamp flashes three times.

High voltage switching technology	Ref.
HV AC universal infrared sensor switch	2000454

IR Sensor universal surface-mounted

Product features:	Non-contact sensor switch for connecting SENSOR SWITCH UNIVERSAL	
Detection area:	1 - 50 mm 90° downwards	
IP protection class:	IP65	
Color:	Black	
Cable length:	2000 mm	

Dimensions

Functions

- ON/OFF when approaching

High voltage switching technology	Ref.
IR Sensor universal surface-mounted	2000456

IR Sensor universal recessed

Product features:	Non-contact sensor switch for connecting SENSOR SWITCH UNIVERSAL	
Detection area:	1 - 50 mm 90° downwards	
Drilling dimensions:	10x17 mm	
IP protection class:	IP65	
Color:	Silver finish	
Cable length:	2000 mm	

The detection area of the sensor (approx. 10x10 mm) must be a bright, matt surface

HV AC radio switch set

1

2

3

Product features:

For convenient, remotely controlled lights and transformers
Function: light ON/OFF by radio transmitter
Up to 9 radio remote controls can be used with one radio switch
Radio remote control can also be installed as a wireless recessed switch Ø 35 mm

Operating voltage: AC 230 V

Max. power: 575 W

Radio range: Max. 50 m in open field

Radio frequency: 433.9 MHz

Color: White/Silver

Cable length: pri.: 2000 mm
sec.: 500 mm

Dimensions

Remote control

Spacer ring

NOTE:

The radio switch and its antenna must maintain a minimum distance of 0.5 m from transformers, ballasts and other electrical devices (e.g. microwaves, stereo and TV systems). Installation on or behind metallic coated foils is not permitted.

ToKi II combi device 230 V

- Product features:
- Double Schuko socket
 - Integrated speaker
 - Bluetooth connection for audio playback
 - USB port for charging smartphones etc
 - Vertical installation under wall cupboards, shelves or on niche rear walls
 - Adjustable in height
- Operating voltage: AC 230 V
- Color: Stainless steel look
- Cable length: 2000 mm, plug type F enclosed loose

H Homogeneous light emission, no LED dots visible

N Almost homogeneous light emission, LED dots marginally visible

S No homogeneous light emission. LED points visible

* Combination not possible. No heat sink or dimensions not compatible

Light with emotion function: the color temperature can be continuously adjusted from warm white to cool white.

Light with Emotion Dual Color: The color temperature can be continuously adjusted from warm white to natural white or switched via adapter cable.

Extra warm white light emission:
Color temperature approx. 2700 K

Warm white light emission:
Color temperature approx. 3000 K

Natural white light emission:
Color temperature approx. 4000 K

Cool white light emission:
Color temperature approx. 6000 K

Luminaire with RGB function: The light color can be infinitely adjusted.

The product complies with the applicable requirements set out in the Community harmonization legislation providing for its affixing.

The marked appliance must not be disposed of with normal household waste, but must be collected separately.

Protection class I: All electrically conductive housing parts of the equipment are connected to the protective conductor system of the fixed electrical installation, which is at earth potential.

Protection class II: Protective insulation, all parts are insulated from each other. The protective conductor must not be connected.

Protection class III: safety extra-low voltage below 120 V DC. Double insulation between mains circuits and output voltage. Lights require a SELV safety transformer.

Independent lamp control gear with a surface temperature of less than 110°C.

Safety Extra Low Voltage (SELV). Electrical voltage that offers special protection against electric shock due to its low level and insulation against higher voltage circuits.

Luminous flux	Luminous flux is the amount of light emitted by a light source and is expressed in lumens (lm).
Luminous efficacy	The luminous efficacy is the ratio of the luminous flux to the electrical power consumed (lm/W). It is the measure of the efficiency of the light source.
Illuminance	Illuminance describes the luminous flux that strikes a surface. It is given in lux (lx = lm/m ²). It is therefore a measure of the brightness with which a surface is illuminated.
Beam angle	The beam angle influences the diameter of the light cone created by the LED luminaire.
Color temperature	The color temperature describes the color impression of a white light source. It is specified in Kelvin (K). The lower the color temperature, the warmer the light. The higher the color temperature, the colder the light. White light sources with a color temperature < 3300 K are referred to as „warm white“, 3300-5300 K as „neutral white“ and light sources > 5300 K as „cool white“
Color binning	LEDs are sorted according to color temperature. The color deviations of the LEDs depend on the fineness of the binnings.
Color rendering index (CRI)	The color rendering index is a value used to describe the quality of the color rendering of light sources at the same color temperature. The higher the value, the better the color rendering. The value 100 corresponds to the color rendering of daylight.
Energy efficiency class	The energy efficiency class provides information about the corresponding energy consumption. Lamps and luminaires are categorized in classes G to A.

Additional safety and installation instructions

Read the safety and installation instructions carefully before installation and keep them together with the installation instructions.

Installation may only be carried out by qualified specialist personnel.

Risk of injury: LEDs shine very brightly. There is a risk of glare and eyes can be damaged. Never look directly into the light source!

Intended use

The product is intended for indoor use

Installation with approved L&S system accessories

Installation and use must be carried out in accordance with the technical data of the respective product.

Particular attention must be paid to

- the permissible power supply
- minimum / maximum load
- max. length of LED strip and cable

Improper use

The product is not intended for use when rolled up.

Avoid installation on uneven or poorly thermally conductive surfaces (e.g. plasterboard, wallpaper, stone). This can considerably reduce the service life and the adhesion of the adhesive tape is not guaranteed.

Do not use in damp or dusty environments without appropriate protective measures.

Do not remove or reuse LED tape that has already been applied.

Installation

- Disconnect the system completely from the power supply during installation and maintenance work. Failure to do so may damage the LED strip.
- Take protective measures against electrostatic discharge (ESD) during installation.
- Observe polarity. The LED strip may be damaged if the polarity is incorrect.
- Mount the LED strip in the aluminum profile or on a heat sink to ensure sufficient cooling.
- Check the LED strip for proper function before bonding.
- Remove grease, oil, dirt and dust from the mounting surface.
- Do not damage or interrupt the conductor tracks. The LED strip can be separated at the marked points (scissor symbol).
- Avoid mechanical stress on the electronic components and connection points.
- Maintain a bending radius of at least 3 cm
- Do not bend over edges.
- Ensure that the power supply is freely accessible for installation, maintenance and repair work.

General notes

A slight deviation in brightness and color of the LEDs is production-related. This does not constitute a defect.
